VARSHA GK

DATA ANALYST

Location: Chennai, India **Phone no:** +91 7200310872 **Email:** varshagk1802@gmail.com

Portfolio: Portfolio **GitHub:** github.com/varshagk1

Professional Summary

M.Sc. Data Science graduate with a background in Computer Science and project experience working with data, creating reports, and checking for missing or duplicate information. Built an Excel dashboard to review expense claims and summarize results with PivotTables, charts, and KPIs. Familiar with Python, SQL, Excel, Power BI, and Tableau; seeking an entry-level Data Analyst position.

Education

M.Sc. Data Science, VIT University, Vellore 2024-2026 | CGPA 7.41

Bachelor of Computer Science, VIT University, Vellore 2021-2024 | CGPA 7.72

Core Skills

Data quality	Expense claim review, policy checks, receipt and duplicate verification, risk classification, audit documentation
Excel and reporting	Microsoft Excel, PivotTables, Pivot Charts, dashboards and KPIs, Power BI, Tableau, Matplotlib
Operations support	Audit workflow checks, status tracking, findings documentation, written and verbal communication, teamwork
Data and office tools	Python (Pandas, NumPy), SQL, MySQL, Oracle, MongoDB, Microsoft Office, Git/GitHub, Jupyter

Selected Projects

Employee Expense Claim Audit Dashboard Microsoft Excel, Pivot Tables, Pivot Charts

Portfolio | GitHub

- Built an Excel audit workbook to review Travel, Food, and Hotel claims against category-wise policy limits, flagging each as Within Limit or Exceeded.
- Added receipt availability and duplicate-claim checks, risk levels, audit status, auditor remarks, and resolution status (Completed or Pending Review) for each claim.
- Created pivot-chart dashboards for employee, category, policy compliance, and risk analysis, with KPIs for total claims, expenses, high-risk claims, and claims needing review.
- In a 10-claim sample (INR 53,200), identified 3 policy violations (30%), 2 missing receipts, and 4 high-risk claims (40%) pending review. Hotel was the highest-spend category (INR 33,500).

Food Recognition and Calorie Estimation using Deep Learning Python, PyTorch, Django

Portfolio | GitHub

- Built a CNN food classifier using ResNet18 transfer learning, data augmentation, and normalization; trained it on 11 food categories and achieved about 92% validation accuracy.
- Mapped model predictions to calorie values and built a Django app with sign-up, login, and image upload that returns the food prediction, confidence score, and estimated calories in real time.

Online E-Learning Platform with Integrated AI Chatbot PHP, MySQL, Flask, JavaScript

Portfolio | GitHub

- Built a full-stack learning application with student accounts, course catalog, enrollment and payment flow, lesson videos, and quizzes. An admin panel manages courses, lectures, students, and payment status.
- Integrated a Flask chatbot using the OpenAI API across platform pages to answer learner questions in real time.

Certifications

- Deloitte Australia Data Analytics Job Simulation (2026)
- Innovating with Google Cloud AI (2026)
- Big Data Computing (2025)
